GET MORE RETURN ON YOUR RETURNS PROCESS

STAFFTRACK® RETURNS

As experts in reverse logistics and returns processing, Stafftrack® Returns has you covered. Our expert solution ensures your returns processing operation is as efficient and cost effective as possible.

With our proprietary returns processing technology, we can scan, disposition, palletize and audit all your inventory. Our real-time reporting also provides your team with full visibility into your returns process at any time. Through Stafftrack® Returns, you'll have peace of mind knowing the correct returns credit is issued to the right customer.

KEY FEATURES

⊘ **Right Credit to the Right Customer:**

Track returns by customer, return authorization and disposition to correctly issue returns credits to your customers every time.

⊘ **Pallet Management:**

Our technology provides your team with pallet details, including UPCs and item quantities, to ensure you can find the right item at any given time. Maintain complete RA integrity with RA and customer information down to the unit level.

⊘ **Reporting:**

Review summary and detailed data by worker, date, product details and more.

⊘ **Flexibility to Fit Your Business**

Stafftrack® Returns is configurable and allows you to create data validation for entry fields and automatically disposition units based on SKU status.

⊘ **Custom Disposition Codes**

Determine which disposition statuses make sense for your business to keep better track of damaged, quality issues, and items to be returned to existing inventory.

⊘ **Worker and Manager Level Views:**

Workers only see what they need for efficient returns processing and managers are offered access into visibility of the entire returns processing team.

REVERSE LOGISTICS ASSOCIATION®

2022 OPERATIONAL EXCELLENCE AWARD WINNER

Don't think of returns processing as a burden again—let our team of expert engineers and award-winning technology optimize your entire reverse logistics operation.
